Projects

Farmer's Helper

- Collaborated in a team of four to design the website which helps farmers in various ways.
- Used JavaScript , HTML and CSS in whole project.
- Now continuing the same project in third year to add some complex functionality like MACHINE LEARNING for disease recognition with user friendly interface.
- Recently we changed the name as CROP CARE.
- *Project link - Farmer's Helper*
- *Working Project link – CROP CARE*

Pack My Bags

- Collaborated with a team of four to develop an tour guiding website.
- Used HTML,CSS and JavaScript in this project.
- Excel sheet is used to store the urls of the images of tourist locations.
- Main function is identifying the forts between the route of starting point and destination within the 60 kilometers.
